

Teachers comments and suggestions on the Wintershall website materials, including the Galleries, Video clips, Interviews, Character Education material.

A great resource for children to relate to real people and their views. How the cast and crew work together models behaviour and attitudes to children. Crew interviews unique – I haven't found anything else like this.

Using bible drama has opened my eyes as a teacher, to relating to Jesus as a human, thinking about his journey as a person and how he felt. It has enabled me to have a deeper empathy

A wonderful resource across the school. Inspiring!

My class found the insights of the actors in the interview clips very powerful. How they had been moved by acting in the performance was very thought provoking and encouraged deep questioning.

The clips were really moving and brought the events to life in a way I had never experienced before. They evoke a much deeper response than the written stories ever could.

Looking and noticing the new in the familiar. Encouraging discussions about interpretation of the Text.

Great impact for children. Able to explore more deeply a particular quality

Powerful on delivering values based teaching linked to the Gospels

Well known Bible stories seen through different eyes. Able to focus on part of the story you have never noticed.

Inspires questioning in adults and children alike

Excellent resource for all but especially for deepening children's learning.

The clips are useful because they show scripture in an engaging way.

Excellent resources for enquiry-based learning for all age groups

Bringing the Gospel to life, looking from a fresh perspective

Prompts questioning of how does this affect me today? What does it mean for me? How could Jesus be talking to me?

Bringing scripture to life, accessible to all children regardless of age or ability

This made scripture real, for children to understand the realities of faith and incorporating it into our daily lives
